[Approved by Governor July 17, 2008. Filed with

LEGISLATIVE COUNSEL'S DIGEST

AB 1764, Blakeslee. Land use: agricultural use.

Existing law, for purposes of the Williamson Act, defines agricultural commodity to mean any and all plant and animal products produced in this state for commercial purposes.

This bill would include in the definition of agricultural commodity plant products used for producing biofuels.

Existing law, for purposes of the Williamson Act, defines open-space use to mean the use of land in a manner that preserves its natural characteristics, beauty, or openness for the benefit and enjoyment of the public, to provide essential habitat for wildlife, or for the solar evaporation of seawater within the course of salt production for commercial purposes, if the land is within, among other things, a wildlife habitat area or a managed wetland area, as defined.

This bill would include land that is within an area enrolled in the United States Department of Agriculture's Conservation Reserve Program or Conservation Reserve Enhancement Program.

The people of the State of California do enact as follows:
